## SUMMARY

Dedicated software engineer with 4 years of experience developing web applications and services. Skilled in Python, JavaScript, and cloud technologies with a focus on building scalable and maintainable solutions.

## SKILLS

Programming Languages: Python, JavaScript, HTML, CSS, SQL  
Frameworks & Libraries: React, Express.js, Node.js, Bootstrap  
Database Systems: MongoDB, MySQL, PostgreSQL  
Tools & Platforms: Git, Docker, AWS (EC2, S3, Lambda), Linux  
Methodologies: Agile, Scrum, Test-Driven Development

## EXPERIENCE

### Software Engineer

*TechStart Solutions | June 2020 - Present*

- Developed and maintained multiple RESTful APIs using Python and Flask, improving system response time by 30%
- Implemented frontend features using React and Redux, enhancing user experience and engagement
- Collaborated with cross-functional teams to implement new features and troubleshoot issues
- Utilized AWS services (EC2, S3, RDS) to deploy and scale applications
- Participated in code reviews to ensure code quality and mentor junior developers

### Junior Developer

*CodeCraft Inc. | August 2018 - May 2020*

- Assisted in the development of an e-commerce platform using MERN stack
- Created and maintained documentation for API endpoints and database schemas
- Implemented responsive designs using CSS and Bootstrap
- Participated in daily stand-ups and sprint planning meetings
- Fixed bugs and optimized existing codebase

## EDUCATION

### Bachelor of Science in Computer Science

*Tech State University | Graduated: May 2018*

- GPA: 3.8/4.0
- Relevant Coursework: Data Structures, Algorithms, Database Systems, Web Development
- Senior Project: Developed a task management application using Python and Django

## PROJECTS

### Weather Forecast Application

- Built a responsive weather application using React and OpenWeather API
- Implemented geolocation features and local storage for saved locations

- Deployed application using Netlify with CI/CD pipeline

### **Task Management System**

- Developed a full-stack task management system using MERN stack
- Implemented user authentication, task assignment, and notification features
- Utilized Socket.io for real-time updates

### **CERTIFICATIONS**

- AWS Certified Developer Associate (2021)
- MongoDB Certified Developer (2020)
